Bachelor of Computer Science,	Sant Gadge Baba Amravati University	Percentage - 74.28	2021 - 2024

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Tailwind CSS, Web Responsive Design

Backend: Node.js, Express.js, Python Flask

Databases: MongoDB, MySQL

Tools: Git, GitHub, VS Code, Postman, Vercel, Netlify

Concepts: REST APIs, SEO Optimization, Web Performance Optimization, Authentication, MVC Architecture, Core Web Vitals

PROJECTS

City Multispeciality Hospital Website | Live:https://www.citymultispecialityhospital.com/

Tech Stack: HTML5, CSS3, JavaScript, Tailwind CSS, Next.js

- Developed a fully responsive hospital website showcasing 30+ services, departments, and doctor profiles to strengthen digital presence.
- Implemented dynamic routing using Next.js for scalable page structure and structured content management.
- Optimized performance using image optimization and code splitting, improving load speed by ~40% and enhancing SEO visibility.
- Integrated contact and inquiry forms to streamline patient communication and structured appointment-related information for easier patient access.
- Deployed and managed the production build ensuring cross-browser compatibility and mobile responsiveness.

Mayra Salon & Academy | Live: https://www.mayrasalonandacademy.com/

Tech Stack: HTML5, Tailwind CSS, JavaScript, Next.js

- Designed and developed a fully responsive website showcasing 25+ services and academy programs, strengthening online brand presence.
- Implemented mobile-first UI and optimized performance using Next.js features, reducing page load time by ~35%.
- Improved SEO structure and content hierarchy to increase search visibility, enhance user engagement, and reduce bounce rate.
- Helped increase online inquiries by improving UI clarity and implementing an optimized contact/booking flow.
- Ensured cross-browser compatibility and deployed the production build in a live hosting environment.

CHATTERS | Real Time Chat Application | https://github.com/PrajwalD2308/ChatApp

Tech Stack: React.js, Node.js, Express.js, Socket.io, MongoDB

- Designed and developed a real-time chat application supporting bi-directional messaging between users.
- Built a responsive and intuitive frontend using React.js for instant message sending and receiving.
- Developed backend server with Node.js and Express.js to handle real-time Socket.io connections efficiently.
- Implemented message storage with timestamps and usernames in MongoDB, enabling persistent chat history.
- Ensured scalable architecture and smooth user experience across devices.
